

Apex Panel

Modern metal roofing at an affordable price

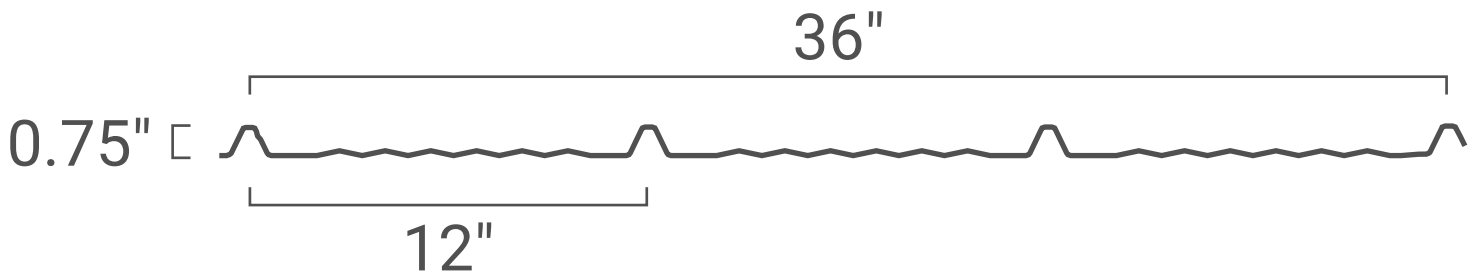

Apex Panel is a uniquely capable, unmistakably beautiful metal roof panel. Four modern style ribs and striations offer a look similar to standing seam, but with the price point and faster installation of a through fastener system.

Design & Size

We provide Apex custom cut to the inch per your specifications. Any length is available from 3' up to 45'. Thickness options include 29 and 26 gauge.

Warranty & Finish

Painted Apex Panel carries a 50-year paint warranty, 50-year substrate warranty, and 30-year fade/chalk warranty and has primer and Galvalume substrate under the paint. Unpainted Galvalume carries a 45-year warranty and is a 45% zinc and 55% aluminum coating with a clear acrylic overcoat.

Purpose & Use

An integrated anti-siphon groove on panel laps allows Apex Panel to be installed on roofs as low as 2.5:12. Strong 3/4" modern-quad ribs enable installation over solid deck and open frame applications.

Apex Panel is at home on residential applications, but functions well as a light commercial panel as well.
